Subject: Copies of FL DOH Documents

Brad,

I am sending out a package of documents that I pulled from the Florida historical radiological survey files as interesting. The letters generally provide some documentation of DOH concern about particular residential developments or survey results. Many appear to be unsigned drafts, but some have complete signatures. Included in this package is a legal document outlining property restrictions related to control of radiation exposures at the Imperial Lakes subdivision. There is no particular order to the documents; they were just copied and put into a file as I came across them. Hope they are useful.

Thanks
George
